

Have an energy-saving day

It is very important to try to save as much energy as possible. As well as saving money from your parents' electricity and petrol bills, it helps reduce the amount of carbon dioxide in the atmosphere.

Select the right words by putting a line through the wrong word to ensure that Katy and her mum save as much energy as possible.

Katy's phone wakes her at 7am. She goes downstairs to make a cup of tea for her and her mum. She **half / completely** fills the kettle and has a **bath / shower** while it is boiling. Once she is dressed and has had her breakfast she turns **all / some** of the lights off before going to school. Her mum gives her a lift to school **on her own / with some school friends**. Katy and her friends work hard all day making sure to use **one side / both sides** of the paper in their work books. For her lunch Katy has some sandwiches, an apple and a can of lemonade. When she has finished she puts the apple core **on the floor / on the school compost heap** and drops the lemonade can in the **playground / school recycling bin**.

Katy's mum comes to meet her after school **on the bus / in her car** and then they go shopping. When they get home, Katy watches the TV while her mum makes curry for tea. When it is ready Katy **turns off / turns down** the TV and eats dinner with her mum. While Katy washes up with a **full / half full** sink of water her mum puts the left over curry in the fridge **straight away / when it has cooled down**. Later in the evening Katy and her mum decide they are too hot so they **take off their jumpers / turn down the heating**.

When they go upstairs to bed they turn the TV **off / to standby** and all the lights **on / off**. Katy cleans her teeth making sure **to leave / not to leave** the taps running.

How many other ways can you think of that would help Katy and her mum save energy . . ?
